PINK CHIMES

MY DARLING

BEECHLEAF

NONPAREIL

1962 CATALOG

Foreword

This year after nearly thirty years of being in the Iris business, we are happy to have the best selection of Iris that we have ever offered to the public. Our listed 514 varieties are all of the best of their kind and priced for any pocketbook. Each year we see all of the new Iris and purchase only the choice introductions. With our ideal growing conditions our plants make rapid increase and we are therefore able to lower the prices rapidly so that the general public can enjoy these new plants.

Our pricing is explained on page 4 as the prices in the catalog are LIST PRICES and are subject to many discounts and premiums. We believe that our pricing arrangement offers the lowest prices possible and will suit both the large and small Iris buyer. We also have not added a packing charge of 25¢ to $1.00 as many of the other dealers have in the last few years.

It will be noted in many of the other catalogs that the cheaper 60¢ to $1.00 Iris have been dropped because of the many increases in Parcel Post in the last few years. We have kept all of the best of the cheaper Iris because they are all good and beautiful Iris and many people cannot afford the newer expensive varieties.

Our policy as in the past is to make sure that our customers are satisfied with our Iris. Please read our guarantee below. We are still doing business with many of our original customers and each year receive hundreds of letters thanking us for the large, well-grown plants.

As in other years our gardens are open to the public at any time, but the bloom period is usually May 15th to May 30th. We are one of the few large commercial Iris growers that will allow the general public to inspect all of their planting. We are 140 miles from Seattle, where the Century 21 Exposition will be held this year and if attending during our blooming season, it will be well worth your while to see our 15 to 20 acres of bloom.

Thanks again to all our customers and to all Iris lovers who have made our business successful and enjoyable.

Yours always for better Iris,

Pooled Garden Club Orders

This Offer Not Available After August 1

By many Garden Club members pooling their orders through their Garden Club, iris can be purchased at half price if CASH PART of the order is $40.00 and up.

It works this way: If total cash part of all orders of members is $40.00, then this $40.00 will purchase $80.00 worth of list price iris. No order less than $3.50 (the cash part) will be prepaid. If cash part of order is less than $3.50 add 50¢ for postage on each order under $3.50 (cash part).

Individual orders, both small and large, can be taken together using this method. Each order will be sent direct to each member; each member will be notified direct of receipt of order. This arrangement will save lots of work for the Directors of the pools.

It will pay each Garden Club or Iris Society to take out a membership in the American Iris Society.

Directors of Iris Pools: Write us for a supply of order blanks so each order will give name and address of each member, amount of order, and varieties they want.

To take advantage of this Pooled Garden Club offer, every order must have the Director send in the orders to us together.

This low priced arrangement for Garden Clubs, we know, will advertise iris, as Garden Club visitors will see them and realize that there is really something in these modern iris varieties.

We will gladly send catalogs free to any member, so send to us the list of your members. There will be an order blank with each catalog.

The Director of the Pooled Garden Club Offer is entitled to "Free Goods" Iris of 10% of list price iris on total cash part of pool. Example: If cash part of pooled order is $100.00, the Director may select $10.00 in list price iris "Free Goods." This is to show our appreciation to the Director for handling the pooled order.

No collections may be used on pooled orders unless as a net item. All collections are net. No cash discounts on pooled orders.

Our guarantee of our rhizomes to grow for you is based on the idea that a defective rhizome may get past our inspectors, and in that case we will replace this defective rhizome if we are notified on or before October 1st, the year of delivery.

Winter kill is something beyond our control, and if you have any winter kill we will make a special price on replacements.

Abuses have crept in on reports from some of our customers, but we know that the large portion of our good customers will not ask for anything that they feel is not right.

Wholesale Is Our Heavy Business

DISPLAY GARDENS pay off; visitors see your collection of good things direct, and know just what they are buying; not depending on color pictures or honey sweet words in descriptive catalogs. A mind's-eye picture is one thing; a view of the real thing is another.

Get some good new varieties in your display gardens, and show the iris-minded public these modern iris.

You will get fast service on delivery from us, so you can fill your orders. Shipments start about July 8th, no earlier. 25% deposit on booking orders, balance before July 5th. The good things will sell out early; so you book early. While we have good stocks, we are not making a play for the general wholesale business; we want to take care of our Old Customers and add some new ones.

The Proper Time to Plant Bearded Iris

There is a definite dormant period of iris rhizomes, and with us that period is July and August. From many experiments we find that planting iris in these two months gives the best results and you are more certain to get bloom the next spring. Late planting will give you about the same increase, but blooming heavily is something else; so if you want blooms and for certain, plant in July and August. In later planting it is hard to get the plants well rooted to winter properly. No free replacement on winter kill.

When rhizomes reach you a fan or so on the rhizomes will be dry. DO NOT PULL OF THIS DRY FAN as the wound will be a soft spot later and may cause the rhizome to pass out of the picture. These dry fans will shove off of their own accord later, as the rhizome grows.

Do not treat the rhizome with any chemical before planting. They are clean and certified before shipping.

Beware of too much fertilizer. If in doubt what to use, use bone meal only.

Instructions to Plant

Where to Plant: The ideal location for your iris is a sunny, well drained position. Sunshine at a minimum half days; iris will not do well in the deep shade. No water should stand in your iris beds. Raise beds slightly above the level of your garden paths if necessary.

Depth to Plant: Place your rhizomes just below the surface of the ground with the roots well spread out underneath so the rhizome is within reach of the warmth of the sun's rays while the roots beneath are in moist (not soggy) soil. Be sure to firm the soil tightly around each rhizome when planting. Follow ordinary good garden practice of watering and setting soil on newly set plants, of course.

Distance Apart: Depends on your particular plants. Generally iris are planted from eight inches to two feet apart. Closer plants are for immediate effect and will need thinning sooner. Plant three of a kind to give an immediate clump effect, in a triangle with the toes of the rhizomes pointing inward. Place eight inches apart. Planted two feet or more apart they may be left for longer periods of time.
